

Business Requirements-Flight Delay Prediction Using ML

- Prediction Accuracy: It should predict the delays accurately with the provided data
- Scalability: The system should be able to handle large volumes of data and be scalable
- User-friendly interface: The system should have a user-friendly interface that allows users to easily access and interpret the information provided
- Flexibility: The system should be flexible enough to incorporate changes in airline schedules, airport conditions, and other factors that may affect flight delays
- Security and privacy measures to protect sensitive data
- Reporting and analytics to support decision-making
